

Bracton Under Counter Dishwashers

Now there is no need to compromise quality and performance for price! Introducing the new range of Bracton glasswashers and dishwashers. A complete range of high performance commercial dishwashers and glasswashers that tick all the boxes.

UC450

Minimal Environmental Impact – Our machines are design specifically with the environment in mind, using less water, less electricity and less chemicals than the majority of our competitors.

Low Voltage Splash Proof Touch Pad – Say good bye to the risk of electric shock and sticky buttons forever.

Superior Performance – The results from the Bracton dishwasher range are second to none.

Advanced Double Filtration – Clean filters, providing a superior finish.

Easy to Use – Auto fill, auto start or one touch operation.

Easy to Clean – Intelligent curved filtration system guides waste to filter.

Advanced Technology – Bracton dishwashers and glasswashers have integrated many parts used in traditional machines, effectively reducing the number of moving parts greatly increasing reliability over the alternatives.

Quality Construction – Bracton uses brass valves and stainless steel AISI304 for body, wash arms and rinse tank – does yours? Many brands use brass arms and copper tanks that corrode over time as a result of contact with corrosive cleaning chemicals, leaving you with a larger repair bill than necessary.
